DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5, 6, 8, 15, 17, 33-35, 38, 39, 41 and 48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by 3,922,455. Applicant's arguments have been considered but are not deemed persuasive for the reasons of record. Applicant argues that the reference does not disclose hook engaging elements integrally formed with the strands, oriented thermoplastic strands or using the strands in a fibrous web. However, the reference discloses the use of its strands in a fibrous web at column 2, lines 47-51 and column 7, lines 62-66. The strands may be an oriented thermoplastic material and the nibs are integral with the strands in view of being bonded to the filaments; see column 5, lines 42-55. The reference also teaches that the nibs which are attached to the filaments may be a variety of shapes including a hook shape; see column 2, lines 14-16 and Figure 8.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 4, 7, 9-14, 16, 18, 19, 36, 37, 40, 42-47 and 49-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over 3,922,455. Applicant's arguments have been considered but are not deemed persuasive for the reasons of record and for the same reasons as set forth above in paragraph 3.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
